14 *Did any particular aspects of this course enhance your learning?*

I think doing the warmups was helpful for understanding the material better in class just because we had seen it on the assignment due in class that day.

15 *Did any particular aspects of this course detract from your learning?*

I don't like how extensive the homeworks started getting towards the end of the course. For the most part homework assignments helped; however, the ones with 30 questions (5 parts per every question, etc.) began to take me an unreal amount of time to complete.Maybe try splitting those homework assignments up (half due at the beginning of the week, half due at the end) because it got to be a lot to handle towards the end.

14 *Did any particular aspects of this course enhance your learning?*

I can't even begin to say how amazing this professor is in his office hours. I hate asking for help and admitting that I don't understand something, but he took away all of my apprehension and was so incredibly understanding and helpful. His overall attitute towards learning and being an educator is inspiring. Incredible professor.

15 *Did any particular aspects of this course detract from your learning?*

It's at 8:00am. That's just tough sometimes.

14 *Did any particular aspects of this course enhance your learning?*

Dr. Reynolds is very engaging and very committed to getting to know his students, which makes a world of difference to us, especially in a math course. His requirement of daily warm-ups, although difficult to meet sometimes, is a great way to keep students accountable for their learning and responsible for their progress. MATLAB is also an excellent way to weave the material into our understanding of llinear algebra. It's worth mentioning that Dr. Reynolds' enthusiasm for his students and passion for the material make an 8AM math class way less strenous than is expected.

15 *Did any particular aspects of this course detract from your learning?*

No.
